

HMS LOADER HMS FIRMWARE LOADER

- Easy and fast software update of Comtech made HMS transponders
- Possibility for changing the communication protocol from ComMon to HMS

GENERAL DESCRIPTION

By using the HMS loader the latest HMS software can be loaded into the COMTECH devices on the network. The software detects all the devices automatically and establishes whether they need update. The update process is realized too by this tool. As an extra function also the elements with special COMTECH protocol can be upgraded to HMS.
